JOURNAL OF PROPULSION AND POWER
Volume 14, No. 6, November–December 1998

1998 *Journal of Propulsion and Power* Index

How to Use the Index

In the Subject Index, pages 1071–1075, each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index. The Author Index, pages 1076 and 1077, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 1078–1083, lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the "CP" or conference volume number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 1998, that paper also will appear in the Chronological Index. Authors of Comments also are listed in the Author Index.

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Three-Dimensional Turbine Rotor Forcing Functions and Linear Theory Analysis B98-024

Performance

Shock-Loss Model for Transonic and Supersonic Axial Compressors with Curved Blades B98-061

STOL/VTOL/STOVL

Influence of Inlet Pressure Distortion on a Convertible Engine Fan B98-011

Energy

Laser Integration/Systems

Laser Propulsion System for Space Vehicles B98-034

Magnetohydrodynamic Power Generation

Analysis of Ar–Cs Magnetohydrodynamics Disk Generator with Strong Interaction B98-052

Pulsed Portable Magnetohydrodynamic Power System Program B98-130

Nuclear Fission

Vortex Formation and Stability in a Scaled Gas-Core Nuclear Rocket Configuration B98-068

Photovoltaic Power

Solar Cell Temperature on Mars B98-015

Mars Dust-Removal Technology B98-016

Rotating Machinery

Influence of Inlet Pressure Distortion on a Convertible Engine Fan B98-011

Numerical Simulation of Incompressible Two-Blade Rotor Flowfields B98-047

Shock-Loss Model for Transonic and Supersonic Axial Compressors with Curved Blades B98-061

Slingatron Mass Launchers B98-069

Potential Field Interactions in a Low-Speed Centrifugal Compressor B98-114

Solar Power

Reflections on Free-Piston Stirling Engines, Part 1: Cyclic Steady Operation B98-064

Reflections on Free-Piston Stirling Engines, Part 2: Stable Operation B98-065

Stirling Engine

Reflections on Free-Piston Stirling Engines, Part 1: Cyclic Steady Operation B98-064

Reflections on Free-Piston Stirling Engines, Part 2: Stable Operation B98-065

Thermionic

Reusable Orbital Transfer Vehicle Applications of an Integrated Solar Upper Stage B98-131

Wind Power

Numerical Simulation of Incompressible Two-Blade Rotor Flowfields B98-047

Fluid Dynamics

Aeroacoustics

Wake Decay: Effect of Freestream Swirl B98-028

Boundary Layers and Heat Transfer—Turbulent

Experimental Analysis of the Turbulent Shear Stresses for Distorted Supersonic Boundary Layers B98-014

Boundary-Layer Stability and Transition

New Model for Intense Self-Similar Vortices B98-060

Computational Fluid Dynamics

Numerical Investigation of Inlet Buzz Flow B98-012

Method for Noise Suppressing Nozzle Calculation and First Results of Its Implementation B98-013

Aerodynamic Shape Optimization of a Subsonic Inlet Using Three-Dimensional Euler Computation B98-029

Overexpanded Two-Dimensional Convergent–Divergent Nozzle Performance, Effects of Three-Dimensional Flow Interactions B98-030

Aerodynamics Performance Prediction of Thrust-Vectoring Nozzles B98-031

Transition Characteristics of Flowfield in a Simulated Solid-Rocket Motor B98-037

Numerical Simulation of Incompressible Two-Blade Rotor Flowfields B98-047

General Numerical Model for Liquid Jet Atomization Applications B98-077

Automated Optimal Design of Two-Dimensional Supersonic Missile Inlets B98-110

Three-Dimensional Flow Theory of Turbomachinery, Part 1: Basic Methodology B98-111

Three-Dimensional Flow Theory of Turbomachinery, Part 2: Design and Analysis System B98-112

Numerical Prediction of Unsteady Transitional Boundary Layer Caused by Rotor–Stator Interaction B98-113

Hydrodynamics

New Model for Intense Self-Similar Vortices B98-060

Mixing and Spray Formation in Coaxial Jets B98-101

Inlet, Nozzle, Diffuser, and Channel Flows

Numerical Investigation of Inlet Buzz Flow B98-012

Method for Noise Suppressing Nozzle Calculation and First Results of Its Implementation B98-013

Aerodynamic Shape Optimization of a Subsonic Inlet Using Three-Dimensional Euler Computation B98-029

Overexpanded Two-Dimensional Convergent–Divergent Nozzle Performance, Effects of Three-Dimensional Flow Interactions B98-030

Aerodynamics Performance Prediction of Thrust-Vectoring Nozzles B98-031

Laser Propulsion System for Space Vehicles B98-034

Transition Characteristics of Flowfield in a Simulated Solid-Rocket Motor B98-037

Methodology to Solve Flowfields of Plug Nozzles for Future Launchers B98-042

Advanced Rocket Nozzles B98-081

Mixing and Spray Formation in Coaxial Jets B98-101

Automated Optimal Design of Two-Dimensional Supersonic Missile Inlets B98-110

Mixer–Ejector Noise-Suppressor Model B98-116

Jets, Wakes, and Viscid-Inviscid Flow Interactions

Wake Decay: Effect of Freestream Swirl B98-028

Methodology to Solve Flowfields of Plug Nozzles for Future Launchers B98-042

Wall Pressure Measurements for a Sonic Jet Injected Transversely into a Supersonic Crossflow B98-107

Multiphase Flows

Spray Structures of Liquid Jets Atomized in Subsonic Crossflows B98-023

General Numerical Model for Liquid Jet Atomization Applications B98-077

Atomization and Breakup of Cryogenic Propellants Under High-Pressure Subcritical and Supercritical Conditions B98-104

Plasmadynamics and MHD

Modeling Plasma Processes in 1-Kilowatt Hydrazine Arcjet Thrusters B98-004

Quasisteady Ablative Magnetoplasmadynamic Thruster Performance with Different Propellants B98-033

Analysis of Ar–Cs Magnetohydrodynamics Disk Generator with Strong Interaction B98-052

High-Power Hydrogen Arcjet Thrusters B98-096
Electrode Configuration on the Performance of a Two-Dimensional Magnetoplasmadynamic Arcjet B98-129
Pulsed Portable Magnetohydrodynamic Power System Program B98-130

Rarefied Flows

Monte Carlo Simulation of Neutral Xenon Flows in Electric Propulsion Devices B98-124

Reacting Flows and Combustion

Reacting Flow Establishment in Ram Accelerators: A Numerical Study B98-001
Study on Trapped-Vortex Combustor—Effect of Injection on Flow Dynamics B98-036
Model of Turbulent Mixing and Reaction for H_2–Air Combustion B98-041
Flame-Holding Configurations for Kerosene Combustion in a Mach 1.8 Airflow B98-059
Properties of Laminar Premixed Hydrocarbon/Air Flames at Various Pressures B98-062
Experimental Investigation of Shear Coaxial Cryogenic Jet Flames B98-103
Modeling High-Pressure Mixing and Combustion Processes in Liquid Rocket Engines B98-105
Numerical Simulation of Hypersonic Shock-Induced Combustion Ramjets B98-108
Ram Accelerator Operating Limits, Part 1: Identification of Limits B98-117
Ram Accelerator Operating Limits, Part 2: Nature of Observed Limits B98-118
Molecular-Beam Mass-Spectrometry to Ammonium Dinitramide Combustion Chemistry Studies B98-122

Separated Flows

Overexpanded Two-Dimensional Convergent–Divergent Nozzle Performance, Effects of Three-Dimensional Flow Interactions B98-030
Heat Transfer in Counterswirled Coaxial Jet Mixing B98-049

Shock Waves and Detonations

Reacting Flow Establishment in Ram Accelerators: A Numerical Study B98-001
Strategies for Pulsed Detonation Engine Performance Optimization B98-063
Ram Accelerator Operating Limits, Part 1: Identification of Limits B98-117
Ram Accelerator Operating Limits, Part 2: Nature of Observed Limits B98-118

Supersonic Flow

Experimental Analysis of the Turbulent Shear Stresses for Distorted Supersonic Boundary Layers B98-014
Sound-Pressure-Level Variations in a Supersonic Rectangular Cavity at Yaw B98-050
Wall Pressure Measurements for a Sonic Jet Injected Transversely into a Supersonic Crossflow B98-107

Transonic Flow

Measured Rotor Wake and Potential Forcing Functions, Including Blade Row Interactions B98-025
Aerodynamic Shape Optimization of a Subsonic Inlet Using Three-Dimensional Euler Computation B98-029
Shock-Loss Model for Transonic and Supersonic Axial Compressors with Curved Blades B98-061

Unsteady Flows

Reacting Flow Establishment in Ram Accelerators: A Numerical Study B98-001
Measured Rotor Wake and Potential Forcing Functions, Including Blade Row Interactions B98-025
Blading Response to Potential Field Interactions in Axial- and Radial-Flow Turbomachinery B98-026
Study on Trapped-Vortex Combustor—Effect of Injection on Flow Dynamics B98-036
Sound-Pressure-Level Variations in a Supersonic Rectangular Cavity at Yaw B98-050
Numerical Prediction of Unsteady Transitional Boundary Layer Caused by Rotor–Stator Interaction B98-113
Potential Field Interactions in a Low-Speed Centrifugal Compressor B98-114

Vortices

Method for Noise Suppressing Nozzle Calculation and First Results of Its Implementation B98-013
New Model for Intense Self-Similar Vortices B98-060
Vortex Formation and Stability in a Scaled Gas-Core Nuclear Rocket Configuration B98-068
Mixer–Ejector Noise-Suppressor Model B98-116

Guidance, Control, and Dynamics Technology

Aircraft Guidance

Modeling and Estimation for Electromechanical Thrust Vector Control of Rocket Engines B98-057

Control System Design

Application of Two-Variable Fuzzy-PI Control in an Aeroengine B98-051

Control System Effectors

Modeling and Estimation for Electromechanical Thrust Vector Control of Rocket Engines B98-057

Control Theory

Experimental Study on Boron–Potassium Nitrate Initiated by Shock B98-054

Dynamics

Modeling and Estimation for Electromechanical Thrust Vector Control of Rocket Engines B98-057

Engine Control

Symmetry Approach to Extension of Flutter Boundaries via Mistuning B98-046
Application of Two-Variable Fuzzy-PI Control in an Aeroengine B98-051
Liquid-Propellant Rocket Engine Health-Monitoring Techniques B98-085

Interdisciplinary Topics

Analytical and Numerical Methods

Jet-Engine Test Cell Augmenter Performance B98-017
Application of Two-Variable Fuzzy-PI Control in an Aeroengine B98-051
Simplified Approach to Performance Evaluation of Nuclear and Electrical Propulsion Systems B98-067
Quality Issues in Propulsion B98-086

Reliability, Maintainability, and Logistics Support

Quality Issues in Propulsion B98-086

Safety

Experimental Study on Boron–Potassium Nitrate Initiated by Shock B98-054

Launch Vehicle and Missile (LV/M) Technology

Launch Vehicle and Sounding Rocket Systems

Cycles for Earth-to-Orbit Propulsion B98-078
Dynamic Amplification of Fluid Pressure in a Propellant Feed Line B98-082
Propellant Management in Booster and Upper-Stage Propulsion Systems B98-084

Propulsion and Propellant Systems

Modified Fracture Mechanics Approach in Structural Analysis of Solid-Rocket Motors B98-053
Slingatron Mass Launchers B98-069
Effect of Propellant Temperature on Efficiency in the Pulsed Plasma Thruster B98-070
Cycles for Earth-to-Orbit Propulsion B98-078
Preliminary Analysis of an Airbreathing and Rocket Combined-Cycle Engine B98-080
Advanced Rocket Nozzles B98-081
Dynamic Amplification of Fluid Pressure in a Propellant Feed Line B98-082
Propellant Technologies: Far-Reaching Benefits for Aeronautical and Space-Vehicle Propulsion B98-083
Propellant Management in Booster and Upper-Stage Propulsion Systems B98-084
Nontoxic Orbital Maneuvering and Reaction Control Systems for Reusable Spacecraft B98-088
Technical Issues Related to Propulsion Systems for Launch Vehicles B98-106

Structural Design (Including Loads)

Modified Fracture Mechanics Approach in Structural Analysis of Solid-Rocket Motors B98-053

Testing, Flight and Ground

Load Oscillations Caused by Unstart of Hypersonic Wind Tunnels and Engines B98-045
Rocket-Based Combined Cycle Propulsion System Testing B98-132

Vibration

Stability Behavior of a Shaft–Disk System Subjected to Longitudinal Force B98-048

Propulsion

Airbreathing Propulsion

Droplet Combustion, Microexplosion, and Sooting Characteristics of Several Energetic Liquid Propellants B98-006
Characteristics of a Trapped-Vortex Combustor B98-008
Digital Simulator for Steady-State Performance Prediction of Military Turbofan Engine B98-010
Influence of Inlet Pressure Distortion on a Convertible Engine Fan B98-011
Numerical Investigation of Inlet Buzz Flow B98-012
Comparison of Physical and Aerodynamic Ramps as Fuel Injectors in Supersonic Flow B98-018
Three-Dimensional Turbine Rotor Forcing Functions and Linear Theory Analysis B98-024
Measured Rotor Wake and Potential Forcing Functions, Including Blade Row Interactions B98-025
Blading Response to Potential Field Interactions in Axial- and Radial-Flow Turbomachinery B98-026
Preliminary Estimation of Engine Gas-Flow-Path Size and Weight B98-027
Wake Decay: Effect of Freestream Swirl B98-028
Aerodynamics Performance Prediction of Thrust-Vectoring Nozzles B98-031
Model of Turbulent Mixing and Reaction for H_2–Air Combustion B98-041
Symmetry Approach to Extension of Flutter Boundaries via Mistuning B98-046
Strategies for Pulsed Detonation Engine Performance Optimization B98-063
Combined-Rocket and Airbreathing Propulsion Systems for Space-Launch Applications B98-079
Preliminary Analysis of an Airbreathing and Rocket Combined-Cycle Engine B98-080
Numerical Prediction of Unsteady Transitional Boundary Layer Caused by Rotor–Stator Interaction B98-113
Potential Field Interactions in a Low-Speed Centrifugal Compressor B98-114
Effects of Compression, Staging, and Braid Angle on Braided Rope Seal Performance B98-115
Mixer–Ejector Noise-Suppressor Model B98-116
Effects of Unmixedness in Piloted-Lean Premixed Gas-Turbine Combustors B98-119
Quantifying Unmixedness in Lean Premixed Combustors Operating at High-Pressure, Fired Conditions B98-120

Combustion and Combustor Designs

Control of Flame-Holding in Supersonic Airflow by Secondary Air Injection B98-002
Characterization of Fuel Regression in a Radial Flow Hybrid Rocket B98-007
Characteristics of a Trapped-Vortex Combustor B98-008
Assessment of a Radiative Heat Transfer Model for Gas Turbine Combustor Preliminary Design B98-009
Investigation of Cryogenic Propellant Flames Using Computerized Tomography of Emission Images B98-019
Leading-Edge Flame Detachment: Effect on Pressure-Coupled Combustion Response B98-021
Ignition Dynamics of Boron Particles in a Shock Tube B98-022
Study on Trapped-Vortex Combustor—Effect of Injection on Flow Dynamics B98-036
Determination of Pressure Dependence of Burning Rate in Solid Motors Using Ultrasonic Technique B98-038
Effect of Catalyst Addition on Subatmospheric Burning Surface Temperature of Composite Propellants B98-039
Temperature and Species Measurements in a Low-Thrust Hydrogen/Oxygen Rocket Engine B98-040
Model of Turbulent Mixing and Reaction for H_2–Air Combustion B98-041
Heat Transfer in Counterswirled Coaxial Jet Mixing B98-049
Properties of Laminar Premixed Hydrocarbon/Air Flames at Various Pressures B98-062
Condensed-Phase Chemical Interaction Between Ammonium Perchlorate and Hydroxy-Terminated Polybutadiene B98-074
Research as a Key in the Design Methodology of Liquid-Propellant Combustion Devices B98-098
Experimental Investigation of Shear Coaxial Cryogenic Jet Flames B98-103
Modeling High-Pressure Mixing and Combustion Processes in Liquid Rocket Engines B98-105
Effects of Unmixedness in Piloted-Lean Premixed Gas-Turbine Combustors B98-119
Quantifying Unmixedness in Lean Premixed Combustors Operating at High-Pressure, Fired Conditions B98-120
Molecular-Beam Mass-Spectrometry to Ammonium Dinitramide Combustion Chemistry Studies B98-122
Ignition and Combustion of Aluminum Particles in $H_2/O_2/N_2$ Combustion Products B98-123

Combustion Instability

Leading-Edge Flame Detachment: Effect on Pressure-Coupled Combustion Response B98-021
Experimental Database Describing Pulse-Triggered Nonlinear Instability in Solid Rocket Motors B98-056
Modeling the Effect of Unsteady Chamber Conditions on Atomization Processes B98-075
Liquid-Propellant Rocket Engine Injector Dynamics B98-100
Effects of Periodic Atomization on Combustion Instability in Liquid-Fueled Propulsion Systems B98-102

Droplet Characterization

Droplet Combustion, Microexplosion, and Sooting Characteristics of Several Energetic Liquid Propellants B98-006
Spray Structures of Liquid Jets Atomized in Subsonic Crossflows B98-023
Near-Critical Liquid Oxygen Droplet Measurements B98-076
Mixing and Spray Formation in Coaxial Jets B98-101
Effects of Periodic Atomization on Combustion Instability in Liquid-Fueled Propulsion Systems B98-102
Atomization and Breakup of Cryogenic Propellants Under High-Pressure Subcritical and Supercritical Conditions B98-104

Ducted Rocket Engines

Combined Rocket and Airbreathing Propulsion Systems for Space-Launch Applications B98-079
Rocket-Based Combined Cycle Propulsion System Testing B98-132

Electric and Advanced Space Propulsion

Improved Physics Model for the Gasdynamic Mirror Fusion Propulsion System B98-003
Modeling Plasma Processes in 1-Kilowatt Hydrazine Arcjet Thrusters B98-004
Propellant Utilization in Hall Thrusters B98-032
Quasisteady Ablative Magnetoplasmadynamic Thruster Performance with Different Propellants B98-033
Transport-Property Measurements in the Plume of an SPT-100 Hall Thruster B98-043
Surface Modification Measurements in the T5 Ion Thruster Plume B98-044
Generic Magnetic Fusion Rocket Model B98-066
Simplified Approach to Performance Evaluation of Nuclear and Electrical Propulsion Systems B98-067
Vortex Formation and Stability in a Scaled Gas-Core Nuclear Rocket Configuration B98-068
Slingatron Mass Launchers B98-069
Effect of Propellant Temperature on Efficiency in the Pulsed Plasma Thruster B98-070
Propellant Losses Because of Particulate Emission in a Pulsed Plasma Thruster B98-071
Arcjet Anode Plasma Measurements Using Electrostatic Probes B98-072
Beamlet Profiles from Multiple-Hole Ion-Extraction Systems B98-073
Status and Issues Related to In-Space Propulsion Systems B98-087
Spacecraft Electric Propulsion—An Overview B98-089
Electric Propulsion for Solar System Exploration B98-090

Ion Thruster Development Trends and Status in the United States B98-091
Pulsed Plasma Thruster B98-092
Main Physical Features and Processes Determining the Performance of Stationary Plasma Thrusters B98-093
Scaling of Thrust in Self-Field Magnetoplasmadynamic Thrusters B98-094
Technology and Application Aspects of Applied Field Magnetoplasmadynamic Propulsion B98-095
High-Power Hydrogen Arcjet Thrusters B98-096
Experimental Performance of Field Emission Microthrusters B98-097
Monte Carlo Simulation of Neutral Xenon Flows in Electric Propulsion Devices B98-124
Microwave Plume Measurements of a Closed Drift Hall Thruster B98-125
Development and Demonstration of a Cathodeless Electron Cyclotron Resonance Ion Thruster B98-126
Numerical Method of Cesium Ion Beams in Field Emission Electric Propulsion Thrusters B98-127
Spot Mode Transition and the Anode Fall of Pulsed Magnetoplasmadynamic Thrusters B98-128
Electrode Configuration on the Performance of a Two-Dimensional Magnetoplasmadynamic Arcjet B98-129
Reusable Orbital Transfer Vehicle Applications of an Integrated Solar Upper Stage B98-131

Engine Performance

Digital Simulator for Steady-State Performance Prediction of Military Turbofan Engine B98-010
Jet-Engine Test Cell Augmenter Performance B98-017
Rocket Propulsion Strategy Based on Kinetic Energy Management B98-035
Temperature and Species Measurements in a Low-Thrust Hydrogen/Oxygen Rocket Engine B98-040
Methodology to Solve Flowfields of Plug Nozzles for Future Launchers B98-042
Preliminary Analysis of an Airbreathing and Rocket Combined-Cycle Engine B98-080
Advanced Rocket Nozzles B98-081
Liquid-Propellant Rocket Engine Health-Monitoring Techniques B98-085
Quality Issues in Propulsion B98-086
Status and Issues Related to In-Space Propulsion Systems B98-087
Research as a Key in the Design Methodology of Liquid-Propellant Combustion Devices B98-098
Technical Issues Related to Propulsion Systems for Launch Vehicles B98-106

Environmental Effects

Technology and Application Aspects of Applied Field Magnetoplasmadynamic Propulsion B98-095
Effects of Unmixedness in Piloted-Lean Premixed Gas-Turbine Combustors B98-119
Quantifying Unmixedness in Lean Premixed Combustors Operating at High-Pressure, Fired Conditions B98-120

Fuels and Propellants, Properties of

Thermal Decomposition of 3,3′-Bis-Azidomethyl-Oxetane B98-005
Droplet Combustion, Microexplosion, and Sooting Characteristics of Several Energetic Liquid Propellants B98-006
Competitive Reactivity of Stabilizers and Ballistic Modifiers During Simulated Aging of Propellants B98-020
Ignition Dynamics of Boron Particles in a Shock Tube B98-022
Determination of Pressure Dependence of Burning Rate in Solid Motors Using Ultrasonic Technique B98-038
Effect of Catalyst Addition on Subatmospheric Burning Surface Temperature of Composite Propellants B98-039
Measurement System for Determining Solid Propellant Burning Rate Using Transmission Microwave Interferometry B98-055
Properties of Laminar Premixed Hydrocarbon/Air Flames at Various Pressures B98-062
Condensed-Phase Chemical Interaction Between Ammonium Perchlorate and Hydroxy-Terminated Polybutadiene B98-074
Propellant Technologies: Far-Reaching Benefits for Aeronautical and Space-Vehicle Propulsion B98-083
Possible Chemical Mechanisms for Boron Hydride Acceleration of Nitramine Decomposition: Literature Review B98-121
Molecular-Beam Mass-Spectrometry to Ammonium Dinitramide Combustion Chemistry Studies B98-122
Ignition and Combustion of Aluminum Particles in $H_2/O_2/N_2$ Combustion Products B98-123

Hybrid Rocket Engines

Characterization of Fuel Regression in a Radial Flow Hybrid Rocket B98-007

Ignition and Ignitor Design

Experimental Study on Boron–Potassium Nitrate Initiated by Shock B98-054

Injector Design and Characterization

Comparison of Physical and Aerodynamic Ramps as Fuel Injectors in Supersonic Flow B98-018
Spray Structures of Liquid Jets Atomized in Subsonic Crossflows B98-023
Modeling the Effect of Unsteady Chamber Conditions on Atomization Processes B98-075
Near-Critical Liquid Oxygen Droplet Measurements B98-076
Liquid-Propellant Rocket Engine Injector Dynamics B98-100
Effects of Periodic Atomization on Combustion Instability in Liquid-Fueled Propulsion Systems B98-102
Atomization and Breakup of Cryogenic Propellants Under High-Pressure Subcritical and Supercritical Conditions B98-104
Modeling High-Pressure Mixing and Combustion Processes in Liquid Rocket Engines B98-105

Liquid Rocket Motors and Missile Systems

Comment on "Development of Equations of State for Compressible Liquids" B96-032
Investigation of Cryogenic Propellant Flames Using Computerized Tomography of Emission Images B98-019
Modeling the Effect of Unsteady Chamber Conditions on Atomization Processes B98-075
Near-Critical Liquid Oxygen Droplet Measurements B98-076
Cycles for Earth-to-Orbit Propulsion B98-078
Nontoxic Orbital Maneuvering and Reaction Control Systems for Reusable Spacecraft B98-088
Experimental Investigation of Shear Coaxial Cryogenic Jet Flames B98-103

Ramjet Combustors

Investigation of a Solid Fuel Scramjet Combustor B98-058
Experimental Investigation of a Supersonic Combustion Solid Fuel Ramjet B98-109

Ramjets and Scramjets

Control of Flame-Holding in Supersonic Airflow by Secondary Air Injection B98-002
Comparison of Physical and Aerodynamic Ramps as Fuel Injectors in Supersonic Flow B98-018
Load Oscillations Caused by Unstart of Hypersonic Wind Tunnels and Engines B98-045
Investigation of a Solid Fuel Scramjet Combustor B98-058
Flame-Holding Configurations for Kerosene Combustion in a Mach 1.8 Airflow B98-059
Numerical Simulation of Hypersonic Shock-Induced Combustion Ramjets B98-108
Experimental Investigation of a Supersonic Combustion Solid Fuel Ramjet B98-109
Ram Accelerator Operating Limits, Part 1: Identification of Limits B98-117
Ram Accelerator Operating Limits, Part 2: Nature of Observed Limits B98-118
Rocket-Based Combined Cycle Propulsion System Testing B98-132

Solid Rocket Motors and Missile Systems

Rocket Propulsion Strategy Based on Kinetic Energy Management B98-035
Transition Characteristics of Flowfield in a Simulated Solid-Rocket Motor B98-037
Determination of Pressure Dependence of Burning Rate in Solid Motors Using Ultrasonic Technique B98-038
Effect of Catalyst Addition on Subatmospheric Burning Surface Temperature of Composite Propellants B98-039
Experimental Database Describing Pulse-Triggered Nonlinear Instability in Solid Rocket Motors B98-056
Condensed-Phase Chemical Interaction Between Ammonium Perchlorate and Hydroxy-Terminated Polybutadiene B98-074
Pulsed Portable Magnetohydrodynamic Power System Program B98-130

Supersonic Combustion

Control of Flame-Holding in Supersonic Airflow by Secondary Air Injection B98-002
Investigation of a Solid Fuel Scramjet Combustor B98-058
Flame-Holding Configurations for Kerosene Combustion in a Mach 1.8 Airflow B98-059
Experimental Investigation of a Supersonic Combustion Solid Fuel Ramjet B98-109

Transient Combustion and Detonation

Strategies for Pulsed Detonation Engine Performance Optimization B98-063
Ignition and Combustion of Aluminum Particles in $H_2/O_2/N_2$ Combustion Products B98-123

Space Technology

Landers

Mars Dust-Removal Technology B98-016

Mission Design and Analysis

Simplified Approach to Performance Evaluation of Nuclear and Electrical Propulsion Systems B98-067
Reusable Orbital Transfer Vehicle Applications of an Integrated Solar Upper Stage B98-131

Space Experiments

Technology and Application Aspects of Applied Field Magnetoplasmadynamic Propulsion B98-095

Space Systems

Reflections on Free-Piston Stirling Engines, Part 1: Cyclic Steady Operation B98-064
Reflections on Free-Piston Stirling Engines, Part 2: Stable Operation B98-065

Spacecraft Communication

Microwave Plume Measurements of a Closed Drift Hall Thruster B98-125

Spacecraft Contamination/Sterilization

Surface Modification Measurements in the T5 Ion Thruster Plume B98-044

Spacecraft Power

Mars Dust-Removal Technology B98-016

Spacecraft Propulsion System Integration

Improved Physics Model for the Gasdynamic Mirror Fusion Propulsion System B98-003
Laser Propulsion System for Space Vehicles B98-034
Transport-Property Measurements in the Plume of an SPT-100 Hall Thruster B98-043
Surface Modification Measurements in the T5 Ion Thruster Plume B98-044
Propellant Losses Because of Particulate Emission in a Pulsed Plasma Thruster B98-071
Propellant Technologies: Far-Reaching Benefits for Aeronautical and Space-Vehicle Propulsion B98-083
Propellant Management in Booster and Upper-Stage Propulsion Systems B98-084
Status and Issues Related to In-Space Propulsion Systems B98-087
Nontoxic Orbital Maneuvering and Reaction Control Systems for Reusable Spacecraft B98-088
Spacecraft Electric Propulsion—An Overview B98-089
Pulsed Plasma Thruster B98-092
Monte Carlo Simulation of Neutral Xenon Flows in Electric Propulsion Devices B98-124
Microwave Plume Measurements of a Closed Drift Hall Thruster B98-125

Spacecraft Thermal Management

Effect of Propellant Temperature on Efficiency in the Pulsed Plasma Thruster B98-070
Propellant Losses Because of Particulate Emission in a Pulsed Plasma Thruster B98-071

Structural Mechanics and Materials

Aeroelasticity and Control

Three-Dimensional Turbine Rotor Forcing Functions and Linear Theory Analysis B98-024

Materials Structural Properties

Effects of Compression, Staging, and Braid Angle on Braided Rope Seal Performance B98-115

Structural Design

Effects of Compression, Staging, and Braid Angle on Braided Rope Seal Performance B98-115

Structural Durability (Including Fatigue, Fracture, and Environmental Degradation)

Symmetry Approach to Extension of Flutter Boundaries via Mistuning B98-046

Structural Dynamics and Characterization

Stability Behavior of a Shaft–Disk System Subjected to Longitudinal Force B98-048

Structural Finite Elements

Modified Fracture Mechanics Approach in Structural Analysis of Solid-Rocket Motors B98-053

Thermophysics and Heat Transfer

Ablation, Pyrolysis, Thermal Decomposition, and Degradation

Ignition Dynamics of Boron Particles in a Shock Tube B98-022
Possible Chemical Mechanisms for Boron Hydride Acceleration of Nitramine Decomposition: Literature Review B98-121

Boiling/Condensation

Investigation of Heat Transfer and Coking Characteristics of Hydrocarbon Fuels B98-099

Forced Convection

Heat Transfer in Counterswirled Coaxial Jet Mixing B98-049
Investigation of Heat Transfer and Coking Characteristics of Hydrocarbon Fuels B98-099

Nonintrusive Diagnostics

Temperature and Species Measurements in a Low-Thrust Hydrogen/Oxygen Rocket Engine B98-040
Measurement System for Determining Solid Propellant Burning Rate Using Transmission Microwave Interferometry B98-055

Radiation in Participating Media

Assessment of a Radiative Heat Transfer Model for Gas Turbine Combustor Preliminary Design B98-009

Thermal Modeling and Analysis

Modeling Plasma Processes in 1-Kilowatt Hydrazine Arcjet Thrusters B98-004
Assessment of a Radiative Heat Transfer Model for Gas Turbine Combustor Preliminary Design B98-009
High-Power Hydrogen Arcjet Thrusters B98-096

Thermochemistry and Chemical Kinetics

Thermal Decomposition of 3,3′-Bis-Azidomethyl-Oxetane B98-005
Possible Chemical Mechanisms for Boron Hydride Acceleration of Nitramine Decomposition: Literature Review B98-121

Thermophysical Properties

Comment on "Development of Equations of State for Compressible Liquids" B96-032
Measurement System for Determining Solid Propellant Burning Rate Using Transmission Microwave Interferometry B98-055

Chronological Index

B96-032 Development of Equations of State for Compressible Liquids. K. Kolcio and A. J. Helmicki, *University of Cincinnati* (**12**, 1, p. 213) Technical Note

Technical Comment by G. Emanuel, *University of Oklahoma* (**14**, 6, p. 1068)

B98-001 Reacting Flow Establishment in Ram Accelerators: A Numerical Study. S. Yungster, K. Radhakrishnan, and M. J. Rabinowitz, *NASA Lewis Research Center* (**14**, 1, p. 10) Article

B98-002 Control of Flame-Holding in Supersonic Airflow by Secondary Air Injection. Shuhei Takahashi, Naohiro Sato, Mitsuhiro Tsue, and Michikata Kono, *University of Tokyo, Japan*; and Masahiko Nakamura, Hiroshi Kondo, and Yasushige Ujiie, *Nihon University, Japan* (**14**, 1, p. 18) Article based on AIAA Paper 96-4585

B98-003 Improved Physics Model for the Gasdynamic Mirror Fusion Propulsion System. Terry Kammash and David L. Galbraith, *University of Michigan* (**14**, 1, p. 24) Article

B98-004 Modeling Plasma Processes in 1-Kilowatt Hydrazine Arcjet Thrusters. Thomas W. Megli, Junqing Lu, Herman Krier, and Rodney L. Burton, *University of Illinois at Urbana–Champaign* (**14**, 1, p. 29) Article

B98-005 Thermal Decomposition of 3,3′-Bis-Azidomethyl-Oxetane. Young Joo Lee, Ching-Jen Tang, Gautam Kudva, and Thomas A. Litzinger, *Pennsylvania State University* (**14**, 1, p. 37) Article

B98-006 Droplet Combustion, Microexplosion, and Sooting Characteristics of Several Energetic Liquid Propellants. T. X. Li, D. L. Zhu, and C. K. Law, *Princeton University* (**14**, 1, p. 45) Article

B98-007 Characterization of Fuel Regression in a Radial Flow Hybrid Rocket. J. R. Caravella Jr., S. D. Heister, and E. J. Wernimont, *Purdue University* (**14**, 1, p. 51) Article based on AIAA Paper 96-3096

B98-008 Characteristics of a Trapped-Vortex Combustor. K.-Y. Hsu and L. P. Goss, *Innovative Scientific Solutions, Inc.*; and W. M. Roquemore, *U.S. Air Force Wright Laboratory* (**14**, 1, p. 57) Article based on AIAA Paper 95-0810

B98-009 Assessment of a Radiative Heat Transfer Model for Gas Turbine Combustor Preliminary Design. Peter J. Stuttaford and Philip A. Rubini, *Cranfield University, England, UK* (**14**, 1, p. 66) Article based on AIAA Paper 97-0294

B98-010 Digital Simulator for Steady-State Performance Prediction of Military Turbofan Engine. Vivek Sanghi, B. K. Lakshmanan, and V. Sundararajan, *Gas Turbine Research Establishment, India* (**14**, 1, p. 74) Article

B98-011 Influence of Inlet Pressure Distortion on a Convertible Engine Fan. Tarik Kaya, *International Space University, France* (**14**, 1, p. 82) Article

B98-012 Numerical Investigation of Inlet Buzz Flow. Pong-Jeu Lu and Ling-Tzong Jain, *National Cheng Kung University, Taiwan, ROC* (**14**, 1, p. 90) Article

B98-013 Method for Noise Suppressing Nozzle Calculation and First Results of Its Implementation. S. Bosniakov, S. Fonov, V. Jitenev, A. Shenkin, V. Vlasenko, and N. Yatskevich, *Central Aerohydrodynamic Institute (TsAGI), Russia* (**14**, 1, p. 101) Article

B98-014 Experimental Analysis of the Turbulent Shear Stresses for Distorted Supersonic Boundary Layers. Joel J. Luker, Chad S. Hale, and Rodney D. W. Bowersox, *U.S. Air Force Institute of Technology* (**14**, 1, p. 110) Article

B98-015 Solar Cell Temperature on Mars. E. Matz, J. Applebaum, and Y. Taitel, *Tel-Aviv University, Israel*; and D. J. Flood, *NASA Lewis Research Center* (**14**, 1, p. 119) Article

B98-016 Mars Dust-Removal Technology. Geoffrey A. Landis, *Ohio Aerospace Institute* (**14**, 1, p. 126) Article

B98-017 Jet-Engine Test Cell Augmenter Performance. C. A. Kodres and G. L. Murphy, *U.S. Naval Facilities Engineering Service Center* (**14**, 2, p. 129) Article

B98-018 Comparison of Physical and Aerodynamic Ramps as Fuel Injectors in Supersonic Flow. Raymond P. Fuller and Pei-Kuan Wu, *Taitech, Inc.*; Abdollah S. Nejad, *U.S. Air Force Research Laboratory*; and Joseph A. Schetz, *Virginia Polytechnic Institute and State University* (**14**, 2, p. 135) Article

B98-019 Investigation of Cryogenic Propellant Flames Using Computerized Tomography of Emission Images. Gerald Herding, Ray Snyder, Carlos Rolon, and Sébastien Candel, *Centre National de la Recherche Scientifique, France* (**14**, 2, p. 146) Article

B98-020 Competitive Reactivity of Stabilizers and Ballistic Modifiers During Simulated Aging of Propellants. M. H. Sammour, *Egyptian Armed Forces* (**14**, 2, p. 152) Article

B98-021 Leading-Edge Flame Detachment: Effect on Pressure-Coupled Combustion Response. C. A. Beiter and E. W. Price, *Georgia Institute of Technology* (**14**, 2, p. 160) Article

B98-022 Ignition Dynamics of Boron Particles in a Shock Tube. Herman Krier, R. L. Burton, M. J. Spalding, and T. J. Rood, *University of Illinois at Urbana–Champaign* (**14**, 2, p. 166) Article based on AIAA Paper 97-3234

B98-023 Spray Structures of Liquid Jets Atomized in Subsonic Crossflows. Pei-Kuan Wu, Kevin A. Kirkendall, and Raymond P.

Fuller, *Taitech, Inc.*; and Abdollah S. Nejad, *U.S. Air Force Research Laboratory* (**14**, 2, p. 173) Article

B98-024 Three-Dimensional Turbine Rotor Forcing Functions and Linear Theory Analysis. David A. Johnston and Sanford Fleeter, *Purdue University* (**14**, 2, p. 183) Article

B98-025 Measured Rotor Wake and Potential Forcing Functions, Including Blade Row Interactions. Robert T. Johnston, John M. Feiereisen, and Sanford Fleeter, *Purdue University* (**14**, 2, p. 191) Article based on AIAA Paper 94-2975

B98-026 Blading Response to Potential Field Interactions in Axial- and Radial-Flow Turbomachinery. Albert J. Sanders and Sanford Fleeter, *Purdue University* (**14**, 2, p. 199) Article

B98-027 Preliminary Estimation of Engine Gas-Flow-Path Size and Weight. Vivek Sanghi, S. Kishore Kumar, and V. Sundararajan, *Gas Turbine Research Establishment, India*; and S. K. Sane, *Indian Institute of Technology* (**14**, 2, p. 208) Article

B98-028 Wake Decay: Effect of Freestream Swirl. J. M. Brookfield, I. A. Waitz, and J. Sell, *Massachusetts Institute of Technology* (**14**, 2, p. 215) Article

B98-029 Aerodynamic Shape Optimization of a Subsonic Inlet Using Three-Dimensional Euler Computation. D. R. Reddy, *NASA Lewis Research Center*; E. S. Reddy, *NYMA, Inc.*; and R. E. Moody, *The Boeing Company* (**14**, 2, p. 225) Article

B98-030 Overexpanded Two-Dimensional Convergent–Divergent Nozzle Performance, Effects of Three-Dimensional Flow Interactions. A. Hamed and C. Vogiatzis, *University of Cincinnati* (**14**, 2, p. 234) Article

B98-031 Aerodynamics Performance Prediction of Thrust-Vectoring Nozzles. A. Matesanz, A. Velázquez, and M. Rodríguez, *SENER, Spain* (**14**, 2, p. 241) Article

B98-032 Propellant Utilization in Hall Thrusters. Y. Raitses and J. Ashkenazy, *Soreq Nuclear Research Center, Israel*; and M. Guelman, *Technion—Israel Institute of Technology* (**14**, 2, p. 247) Article

B98-033 Quasisteady Ablative Magnetoplasmadynamic Thruster Performance with Different Propellants. Giorgio Paccani and Ugo Chiarotti, *University of Rome "La Sapienza," Italy*; and William D. Deininger, *FiatAvio Comprensorio BPD, Italy* (**14**, 2, p. 254) Article

B98-034 Laser Propulsion System for Space Vehicles. Aviad Brandstein, *Israeli Air Force*; and Yeshayahou Levy, *Technion—Israel Institute of Technology* (**14**, 2, p. 261) Article

Errata (14, 6, p. 1069)

B98-035 Rocket Propulsion Strategy Based on Kinetic Energy Management. Merrill K. King, *NASA Headquarters* (**14**, 2, p. 270) Technical Note

B98-036 Study on Trapped-Vortex Combustor—Effect of Injection on Flow Dynamics. Viswanath R. Katta, *Innovative Scientific Solutions, Inc.*; and W. M. Roquemore, *U.S. Air Force Research Laboratory* (**14**, 3, p. 273) Article based on AIAA Paper 97-3256

B98-037 Transition Characteristics of Flowfield in a Simulated Solid-Rocket Motor. Tong-Miin Liou, Wan-Yih Lien, and Po-Wen Hwang, *National Tsing Hua University, Taiwan, ROC* (**14**, 3, p. 282) Article

B98-038 Determination of Pressure Dependence of Burning Rate in Solid Motors Using Ultrasonic Technique. Desh Deepak, R. Jeenu, P. Sridharan, and M. S. Padmanabhan, *Vikram Sarabhai Space Centre, India* (**14**, 3, p. 290) Article

B98-039 Effect of Catalyst Addition on Subatmospheric Burning Surface Temperature of Composite Propellants. S. Krishnan and R. D. Swami, *Indian Institute of Technology* (**14**, 3, p. 295) Article

B98-040 Temperature and Species Measurements in a Low-Thrust Hydrogen/Oxygen Rocket Engine. Wilhelmus A. de Groot, *NYMA, Inc.* (**14**, 3, p. 301) Article

B98-041 Model of Turbulent Mixing and Reaction for H_2-Air Combustion. Marc A. Cremer, *Reaction Engineering International*; and Patrick A. McMurtry, *University of Utah* (**14**, 3, p. 309) Article

B98-042 Methodology to Solve Flowfields of Plug Nozzles for Future Launchers. Francesco Nasuti and Marcello Onofri, *University of Rome "La Sapienza," Italy* (**14**, 3, p. 318) Article based on AIAA Paper 97-2941

B98-043 Transport-Property Measurements in the Plume of an SPT-100 Hall Thruster. Lyon B. King, Alec D. Gallimore, and Colleen M. Marrese, *University of Michigan* (**14**, 3, p. 327) Article

B98-044 Surface Modification Measurements in the T5 Ion Thruster Plume. L. Najeeb Ahmed and Mark W. Crofton, *The Aerospace Corporation* (**14**, 3, p. 336) Article

B98-045 Load Oscillations Caused by Unstart of Hypersonic Wind Tunnels and Engines. Takashi Shimura, Tohru Mitani, Noboru Sakuranaka, and Muneo Izumikawa, *National Aerospace Laboratory, Japan* (**14**, 3, p. 348) Article based on AIAA Paper 96-3242

B98-046 Symmetry Approach to Extension of Flutter Boundaries via Mistuning. B. Shapiro, *California Institute of Technology* (**14**, 3, p. 354) Article

B98-047 Numerical Simulation of Incompressible Two-Blade Rotor Flowfields. John A. Ekaterinaris, *Risoe National Laboratory, Denmark* (**14**, 3, p. 367) Article based on AIAA Paper 97-0398

B98-048 Stability Behavior of a Shaft–Disk System Subjected to Longitudinal Force. Lien-Wen Chen and Hong-Cheng Sheu, *National Cheng Kung University, Taiwan, ROC* (**14**, 3, p. 375) Article

B98-049 Heat Transfer in Counterswirled Coaxial Jet Mixing. J. L. Sanger, *Woodworker's Supply*; and P. A. Dellenback, *University of Wyoming* (**14**, 3, p. 384) Article

B98-050 Sound-Pressure-Level Variations in a Supersonic Rectangular Cavity at Yaw. Peter J. Disimile and Paul D. Orkwis, *University of Cincinnati* (**14**, 3, p. 392) Article

B98-051 Application of Two-Variable Fuzzy-PI Control in an Aeroengine. Fang Zhongxiang and Wu Chihua, *Northwestern Polytechnical University, PRC* (**14**, 3, p. 399) Article

B98-052 Analysis of Ar-Cs Magnetohydrodynamics Disk Generator with Strong Interaction. Motoo Ishikawa, Takuro Shiomi, and Yoshitaka Inui, *Kyoto University, Japan*; and Hiroyuki Yamasaki, *Tokyo Institute of Technology, Japan* (**14**, 3, p. 403) Article

B98-053 Modified Fracture Mechanics Approach in Structural Analysis of Solid-Rocket Motors. Sook-Ying Ho, *Aeronautical and Maritime Research Laboratory, Australia*; and Gerard Carè, *G+D Computing Pty. Ltd., Australia* (**14**, 4, p. 409) Article

B98-054 Experimental Study on Boron–Potassium Nitrate Initiated by Shock. Liqiong Wang and Changgen Feng, *Beijing Institute of Technology, PRC*; and Changsheng Han, *China Academy of Engineering Physics, PRC* (**14**, 4, p. 416) Article

B98-055 Measurement System for Determining Solid Propellant Burning Rate Using Transmission Microwave Interferometry. Vladica S. Bozic, Djordje D. Blagojevic, and Bozidar A. Anicin, *Belgrade University, Yugoslavia* (**14**, 4, p. 421) Article based on AIAA Paper 97-2842

B98-056 Experimental Database Describing Pulse-Triggered Nonlinear Instability in Solid Rocket Motors. P. G. Harris, *Defence Research Establishment Valcartier, Canada*; and A. De Champlain, *Laval University, Canada* (**14**, 4, p. 429) Article

B98-057 Modeling and Estimation for Electromechanical Thrust Vector Control of Rocket Engines. Dale E. Schinstock, Douglas A. Scott, and Tim A. Haskew, *University of Alabama* (**14**, 4, p. 440) Article

B98-058 Investigation of a Solid Fuel Scramjet Combustor. Adela Ben-Yakar, Benveniste Natan, and Alon Gany, *Technion—Israel Institute of Technology* (**14**, 4, p. 447) Article

B98-059 Flame-Holding Configurations for Kerosene Combustion in a Mach 1.8 Airflow. Michael G. Owens, Sharam Tehranian, and Corin Segal, *University of Florida*; and Viatcheslav A. Vinogradov, *Central Institute of Aviation Motors, Russia* (**14**, 4, p. 456) Article

B98-060 New Model for Intense Self-Similar Vortices. Georgios H. Vatistas, *Concordia University, Canada* (**14**, 4, p. 462) Article

B98-061 Shock-Loss Model for Transonic and Supersonic Axial Compressors with Curved Blades. M. T. Schobeiri, *Texas A&M University* (**14**, 4, p. 470) Article

B98-062 Properties of Laminar Premixed Hydrocarbon/Air Flames at Various Pressures. M. I. Hassan, K. T. Aung, O. C. Kwon, and G. M. Faeth, *University of Michigan* (**14**, 4, p. 479) Article

B98-063 Strategies for Pulsed Detonation Engine Performance Optimization. J.-L. Cambier, *FFA, Aeronautical Research Institute of Sweden*; and J. K. Tegnér, *FOA, Sweden* (**14**, 4, p. 489) Article based on AIAA Paper 97-2743

B98-064 Reflections on Free-Piston Stirling Engines, Part 1: Cyclic Steady Operation. F. de Monte, *University of L'Aquila, Italy*; and G. Benvenuto, *University of Genoa, Italy* (**14**, 4, p. 499) Article

B98-065 Reflections on Free-Piston Stirling Engines, Part 2: Stable Operation. F. de Monte, *University of L'Aquila, Italy*; and G. Benvenuto, *University of Genoa, Italy* (**14**, 4, p. 509) Article

B98-066 Generic Magnetic Fusion Rocket Model. John F. Santarius, *University of Wisconsin*; and B. Grant Logan, *Lawrence Livermore National Laboratory* (**14**, 4, p. 519) Article based on AIAA Paper 93-2029

B98-067 Simplified Approach to Performance Evaluation of Nuclear and Electrical Propulsion Systems. Fernando de Souza Costa and João Andrade de Carvalho Jr., *National Space Research Institute, Brazil* (**14**, 4, p. 525) Article

B98-068 Vortex Formation and Stability in a Scaled Gas-Core Nuclear Rocket Configuration. L. E. Thode, M. C. Cline, and S. D. Howe, *Los Alamos National Laboratory* (**14**, 4, p. 530) Article based on AIAA Paper 97-2955

B98-069 Slingatron Mass Launchers. Derek A. Tidman, *Slingatron Technologies, Inc.* (**14**, 4, p. 537) Article

B98-070 Effect of Propellant Temperature on Efficiency in the Pulsed Plasma Thruster. Gregory G. Spanjers, Jamie B. Malak, Robert J. Leiweke, and Ronald A. Spores, *U.S. Air Force Research Laboratory* (**14**, 4, p. 545) Article

B98-071 Propellant Losses Because of Particulate Emission in a Pulsed Plasma Thruster. Gregory G. Spanjers, Jason S. Lotspeich, Keith A. McFall, and Ronald A. Spores, *U.S. Air Force Research Laboratory* (**14**, 4, p. 554) Article

B98-072 Arcjet Anode Plasma Measurements Using Electrostatic Probes. Nicholas T. Tiliakos, Rodney L. Burton, and Herman Krier, *University of Illinois at Urbana–Champaign* (**14**, 4, p.

560) Article based on AIAA Paper 97-3201

B98-073 Beamlet Profiles from Multiple-Hole Ion-Extraction Systems. Yukio Hayakawa, Shoji Kitamura, and Katsuhiro Miyazaki, *National Aerospace Laboratory, Japan* (**14**, 4, p. 568) Article based on AIAA Paper 96-3199

B98-074 Condensed-Phase Chemical Interaction Between Ammonium Perchlorate and Hydroxy-Terminated Polybutadiene. I. Jojic and M. Q. Brewster, *University of Illinois at Urbana–Champaign* (**14**, 4, p. 575) Technical Note

B98-075 Modeling the Effect of Unsteady Chamber Conditions on Atomization Processes. K. M. Rump and S. D. Heister, *Purdue University* (**14**, 4, p. 576) Technical Note based on AIAA Paper 97-3298

B98-076 Near-Critical Liquid Oxygen Droplet Measurements. M. Ferraro, R. J. Kujala, J.-L. Thomas, M. J. Glogowski, and M. M. Micci, *Pennsylvania State University* (**14**, 4, p. 579) Technical Note

B98-077 General Numerical Model for Liquid Jet Atomization Applications. Yen-Sen Chen and Huan-Min Shang, *Engineering Sciences, Inc.*; Chien-Pin Chen, *University of Alabama in Huntsville*; and Ten-See Wang, *NASA Marshall Space Flight Center* (**14**, 4, p. 581) Technical Note

B98-078 Cycles for Earth-to-Orbit Propulsion. Detlef Manski, Christoph Goertz, and Hagen-D. Saßnick, *DLR, German Aerospace Center;* James R. Hulka, *Aerojet;* and B. David Goracke and Daniel J. H. Levack, *The Boeing Company* (**14**, 5, p. 588) Article

B98-079 Combined Rocket and Airbreathing Propulsion Systems for Space-Launch Applications. Russell Daines, *Brigham Young University;* and Corin Segal, *University of Florida* (**14**, 5, p. 605) Article

B98-080 Preliminary Analysis of an Airbreathing and Rocket Combined-Cycle Engine. Feng Qi and Jue Wang, *China Academy of Launch Vehicle Technology;* and Chien-Pin Chen, *University of Alabama in Huntsville* (**14**, 5, p. 613) Article

B98-081 Advanced Rocket Nozzles. Gerald Hagemann, *DLR, German Aerospace Center;* Hans Immich, *Daimler–Benz AG, Germany;* Thong Van Nguyen, *GenCorp Aerojet;* and Gennady E. Dumnov, *Keldysh Research Center, Russia* (**14**, 5, p. 620) Article

B98-082 Dynamic Amplification of Fluid Pressure in a Propellant Feed Line. T. V. Nguyen and W. E. Huffman, *GenCorp Aerojet* (**14**, 5, p. 635) Article

B98-083 Propellant Technologies: Far-Reaching Benefits for Aeronautical and Space-Vehicle Propulsion. Bryan Palaszewski, *NASA Lewis Research Center;* Leonid S. Ianovski, *Central Institute of Aviation Motors, Russia;* and Patrick Carrick, *U.S. Air Force Research Laboratory* (**14**, 5, p. 641) Article

B98-084 Propellant Management in Booster and Upper-Stage Propulsion Systems. Mark F. Fisher, *NASA Marshall Space Flight Center* (**14**, 5, p. 649) Article

B98-085 Liquid-Propellant Rocket Engine Health-Monitoring Techniques. Yulin Zhang, Jianjun Wu, Minchao Huang, Hengwei Zhu, and Qizhi Chen, *National University of Defense Technology, PRC* (**14**, 5, p. 657) Article

B98-086 Quality Issues in Propulsion. John P. McCarty, *McCarty Group, Inc.;* and Garry M. Lyles, *NASA Marshall Space Flight Center* (**14**, 5, p. 664) Article

B98-087 Status and Issues Related to In-Space Propulsion Systems. R. L. Sackheim and D. C. Byers, *TRW Space and Electronics Group* (**14**, 5, p. 669) Article

B98-088 Nontoxic Orbital Maneuvering and Reaction Control Systems for Reusable Spacecraft. Eric Hurlbert, John Applewhite, and Tien Nguyen, *NASA Johnson Space Center;* Brian Reed, *NASA Lewis Research Center;* and Zhang Baojiong and Wang Yue, *Shanghai Academy of Spaceflight Technology, PRC* (**14**, 5, p. 676) Article

B98-089 Spacecraft Electric Propulsion—An Overview. M. Martinez-Sanchez, *Massachusetts Institute of Technology;* and J. E. Pollard, *The Aerospace Corporation* (**14**, 5, p. 688) Article

B98-090 Electric Propulsion for Solar System Exploration. John R. Brophy and Muriel Noca, *Jet Propulsion Laboratory, California Institute of Technology* (**14**, 5, p. 700) Article

B98-091 Ion Thruster Development Trends and Status in the United States. Paul J. Wilbur, *Colorado State University;* Vincent K. Rawlin, *NASA Lewis Research Center;* and J. R. Beattie, *Hughes Space and Communication Company* (**14**, 5, p. 708) Article

B98-092 Pulsed Plasma Thruster. R. L. Burton, *University of Illinois at Urbana–Champaign;* and P. J. Turchi, *Ohio State University* (**14**, 5, p. 716) Article

B98-093 Main Physical Features and Processes Determining the Performance of Stationary Plasma Thrusters. Vladimir Kim, *Moscow Aviation Institute, Russia* (**14**, 5, p. 736) Article

B98-094 Scaling of Thrust in Self-Field Magnetoplasmadynamic Thrusters. Edgar Choueiri, *Princeton University* (**14**, 5, p. 744) Article

B98-095 Technology and Application Aspects of Applied Field Magnetoplasmadynamic Propulsion. Gerd Krülle, *DLR, German Aerospace Center;* Monika Auweter-Kurtz, *University of Stuttgart, Germany;* and Akihiro Sasoh, *Tohoku University, Japan* (**14**, 5, p. 754) Article

B98-096 High-Power Hydrogen Arcjet Thrusters. Monika Auweter-Kurtz, Thomas Gölz, Harald Habiger, Frank Hammer, Helmut Kurtz, Martin Riehle, and Christian Sleziona, *University of Stuttgart, Germany* (**14**, 5, p. 764) Article

B98-097 Experimental Performance of Field Emission Microthrusters. Salvo Marcuccio, Angelo Genovese, and Mariano Andrenucci, *Centrospazio, Italy* (**14**, 5, p. 774) Article

B98-098 Research as a Key in the Design Methodology of Liquid-Propellant Combustion Devices. M. Habiballah and L. Vingert, *ONERA, France;* V. Duthoit, *Société Européenne de Propulsion, France;* and P. Vuillermoz, *Centre National d'Études Spatiales, France* (**14**, 5, p. 782) Article

B98-099 Investigation of Heat Transfer and Coking Characteristics of Hydrocarbon Fuels. Keming Liang, Baoe Yang, and Zhongli Zhang, *China Aerospace Industry Corporation* (**14**, 5, p. 789) Article

B98-100 Liquid-Propellant Rocket Engine Injector Dynamics. Vladimir G. Bazarov, *Moscow State Aviation Institute;* and Vigor Yang, *Pennsylvania State University* (**14**, 5, p. 797) Article

B98-101 Mixing and Spray Formation in Coaxial Jets. Emmanuel Villermaux, *Centre National de la Recherche Scientifique, France* (**14**, 5, p. 807) Article

B98-102 Effects of Periodic Atomization on Combustion Instability in Liquid-Fueled Propulsion Systems. W. E. Anderson, K. L. Miller, H. M. Ryan, S. Pal, and R. J. Santoro, *Pennsylvania State University;* and J. L. Dressler, *Fluid Jet Associates* (**14**, 5, p. 818) Article

B98-103 Experimental Investigation of Shear Coaxial Cryogenic Jet Flames. S. Candel, G. Herding, R. Snyder, P. Scouflaire, and C. Rolon, *École Centrale Paris;* L. Vingert, M. Habiballah, F. Grisch, M. Péalat, and P. Bouchardy, *ONERA, France;* D. Stepowski, A. Cessou, and P. Colin, *Université de Rouen, France* (**14**, 5, p. 826) Article

B98-104 Atomization and Breakup of Cryogenic Propellants Under High-Pressure Subcritical and Supercritical Conditions. Wolfgang O. H. Mayer and Axel H. A. Schik, *DLR, German Aerospace Center;* Bruno Vielle, Christian Chauveau, and Iskender Gökalp, *Centre National de la Recherche Scientifique, France;* and Douglas G. Talley and Rodger D. Woodward, *U.S. Air Force Research Laboratory* (**14**, 5, p. 835) Article

B98-105 Modeling High-Pressure Mixing and Combustion Processes in Liquid Rocket Engines. Joseph C. Oefelein and Vigor Yang, *Pennsylvania State University* (**14**, 5, p. 843) Article

B98-106 Technical Issues Related to Propulsion Systems for Launch Vehicles. Pingxin Hu, Ningchang Zhu, Baojiong Zhang, and Guoqiu Liu, *China Aerospace Corporation* (**14**, 5, p. 858) Technical Note

B98-107 Wall Pressure Measurements for a Sonic Jet Injected Transversely into a Supersonic Crossflow. D. E. Everett, *Whirlpool Corporation*; M. A. Woodmansee and J. C. Dutton, *University of Illinois at Urbana–Champaign*; and M. J. Morris, *Bradley University* (**14**, 6, p. 861) Article

B98-108 Numerical Simulation of Hypersonic Shock-Induced Combustion Ramjets. R. Dudebout, J. P. Sislian, and R. Oppitz, *University of Toronto, Canada* (**14**, 6, p. 869) Article based on AIAA Paper 94-3098

B98-109 Experimental Investigation of a Supersonic Combustion Solid Fuel Ramjet . Abraham Cohen-Zur and Benveniste Natan, *Technion—Israel Institute of Technology* (**14**, 6, p. 880) Article based on AIAA Paper 97-3237

B98-110 Automated Optimal Design of Two-Dimensional Supersonic Missile Inlets. Michael Blaize, Doyle Knight, and Khaled Rasheed, *Rutgers University* (**14**, 6, p. 890) Article

B98-111 Three-Dimensional Flow Theory of Turbomachinery, Part 1: Basic Methodology. Jianzhong Xu, Manchu Ge, Xiaolu Zhao, and Zhengming Wang, *Chinese Academy of Sciences, PRC* (**14**, 6, p. 899) Article

B98-112 Three-Dimensional Flow Theory of Turbomachinery, Part 2: Design and Analysis System. Jianzhong Xu, Manchu Ge, Xiaolu Zhao, and Zhengming Wang, *Chinese Academy of Sciences, PRC* (**14**, 6, p. 907) Article

B98-113 Numerical Prediction of Unsteady Transitional Boundary Layer Caused by Rotor–Stator Interaction. Dongjin Kang and Budugur Lakshminarayana, *Pennsylvania State University* (**14**, 6, p. 916) Article based on AIAA Paper 97-2752

B98-114 Potential Field Interactions in a Low-Speed Centrifugal Compressor. Albert J. Sanders and Sanford Fleeter, *Purdue University* (**14**, 6, p. 925) Article

B98-115 Effects of Compression, Staging, and Braid Angle on Braided Rope Seal Performance. Bruce M. Steinetz, *NASA Lewis Research Center*; and Michael L. Adams, *Modern Technologies Corporation* (**14**, 6, p. 934) Article based on AIAA Paper 97-2872

B98-116 Mixer–Ejector Noise-Suppressor Model. David E. Tew, Brian S. Teeple, and Ian A. Waitz, *Massachusetts Institute of Technology* (**14**, 6, p. 941) Article

B98-117 Ram Accelerator Operating Limits, Part 1: Identification of Limits. A. J. Higgins, C. Knowlen, and A. P. Bruckner, *University of Washington* (**14**, 6, p. 951) Article

B98-118 Ram Accelerator Operating Limits, Part 2: Nature of Observed Limits. A. J. Higgins, C. Knowlen, and A. P. Bruckner, *University of Washington* (**14**, 6, p. 959) Article

B98-119 Effects of Unmixedness in Piloted-Lean Premixed Gas-Turbine Combustors. J. C. Barnes and A. M. Mellor, *Vanderbilt University* (**14**, 6, p. 967) Article

B98-120 Quantifying Unmixedness in Lean Premixed Combustors Operating at High-Pressure, Fired Conditions. J. C. Barnes and A. M. Mellor, *Vanderbilt University* (**14**, 6, p. 974) Article

B98-121 Possible Chemical Mechanisms for Boron Hydride Acceleration of Nitramine Decomposition: Literature Review. Michael A. Schroeder, *U.S. Army Research Laboratory* (**14**, 6, p. 981) Article

B98-122 Molecular-Beam Mass-Spectrometry to Ammonium Dinitramide Combustion Chemistry Studies. Oleg P. Korobeinichev, Leonid V. Kuibida, Alexander A. Paletsky, and Andrey G. Shmakov, *Russian Academy of Sciences* (**14**, 6, p. 991) Article based on AIAA Paper 98-0445

B98-123 Ignition and Combustion of Aluminum Particles in $H_2/O_2/N_2$ Combustion Products. Robert O. Foelsche, Rodney L. Burton, and Herman Krier, *University of Illinois at Urbana–Champaign* (**14**, 6, p. 1001) Article

B98-124 Monte Carlo Simulation of Neutral Xenon Flows in Electric Propulsion Devices. Iain D. Boyd, Douglas B. Van Gilder, and Xiaoming Liu, *Cornell University* (**14**, 6, p. 1009) Article

B98-125 Microwave Plume Measurements of a Closed Drift Hall Thruster. Shawn Ohler, Brian E. Gilchrist, and Alec Gallimore, *University of Michigan* (**14**, 6, p. 1016) Article based on AIAA Paper 95-2931

B98-126 Development and Demonstration of a Cathodeless Electron Cyclotron Resonance Ion Thruster. Hitoshi Kuninaka and Shin Satori, *Institute of Space and Astronautical Science, Japan* (**14**, 6, p. 1022) Article

B98-127 Numerical Method of Cesium Ion Beams in Field Emission Electric Propulsion Thrusters. Mariano Andrenucci, *University of Pisa, Italy*; Alessandro Ciucci and Salvo Marcuccio, *Centrospazio, Italy*; and Giuseppe Barsotti, *University of Pisa, Italy* (**14**, 6, p. 1027) Article

B98-128 Spot Mode Transition and the Anode Fall of Pulsed Magnetoplasmadynamic Thrusters. Kevin D. Diamant, Edgar Y. Choueiri, and Robert G. Jahn, *Princeton University* (**14**, 6, p. 1036) Article

B98-129 Electrode Configuration Effect on the Performance of a Two-Dimensional Magnetoplasmadynamic Arcjet. I. Funaki, K. Toki, and K. Kuriki, *Institute of Space and Astronautical Science, Japan* (**14**, 6, p. 1043) Article

B98-130 Pulsed Portable Magnetohydrodynamic Power System Program. Daniel W. Swallom, Victor M. Goldfarb, Judy S. Gibbs, and Isaac Sadovnik, *Textron Systems Corporation*; Vladimir A. Zeigarnik, *IVTAN Association of the Russian Academy of Sciences*; Alexander G. Blokh, *Nizhny Novgorod Machine Building Plant, Russia*; and Jury P. Babakov, *Federal Center of Dual Technologies "Soyuz," Russia* (**14**, 6, p. 1049) Article

B98-131 Reusable Orbital Transfer Vehicle Applications of an Integrated Solar Upper Stage. Patrick E. Frye, *The Boeing Company*; and Fred G. Kennedy III, *U.S. Air Force Research Laboratory* (**14**, 6, p. 1059) Article based on AIAA Paper 97-2981

B98-132 Rocket-Based Combined Cycle Propulsion System Testing. H. Douglas Perkins, Scott R. Thomas, and James R. DeBonis, *NASA Lewis Research Center* (**14**, 6, p. 1065) Technical Note based on AIAA Paper 97-0565
